

Geotechnical Engineer

CATLIN Engineers and Scientists (CATLIN) is a leading geotechnical, environmental and civil engineering firm in the Southeast, celebrating our 34th Anniversary this year. As we continue to grow, we are seeking experienced Geotechnical Engineers to join our Wilmington, Raleigh, or Washington NC offices.

Key activities and responsibilities include, but are not limited to:

- Prepare Bridge Foundation Design Recommendations
- Prepare Roadway Foundation Design Recommendations
- Prepare Wall Foundation Design Recommendations
- Provide input to Project Managers concerning cost estimates, scopes of work, field investigations, sampling, and lab analysis
- Assist with the preparation of construction plans and project specifications
- Periodic site visits and review of construction submittals
- Proficiency using MicroStation, GeoPak, Slide, GRLWEAP, A-pile and L-pile

Minimum requirements include:

- Bachelor's Degree in Civil/Geotechnical Engineering or related engineering field from an ABET accredited university
- Professional Engineer's License in NC or ability to obtain license in NC
- At least 5 years of experience in geotechnical engineering design
- Ability to obtain DoD military base access
- Demonstrated professional and technical verbal and written communication skills

Preferred qualifications include:

- Master's Degree in Geotechnical Engineering or related field
- Geotechnical engineering design experience in the transportation industry
- Ideal candidates will be able to provide examples of previous sealed foundation designs specific to the transportation industry.

CATLIN is an equal opportunity employer and offers competitive compensation and benefits, including health and dental insurance and 401K retirement plan.

Please send cover letter and resume to:
