

## Field Geologist

CATLIN Engineers and Scientists (CATLIN) is seeking an entry level geologist, engineering geologist, or geotechnical engineer. Responsibilities include a variety of field and office tasks associated with geotechnical and geo-environmental investigations.

Field activities will include site reconnaissance, supervision of investigative team, field logging of soil and rock samples, supervising monitoring well installation, collection of soil and groundwater samples for laboratory analysis, and basic GPS and traditional surveying.

In addition, this position will involve evaluation of field and laboratory data, data reduction and input, geotechnical laboratory testing, preparation of data tables, and report preparation. Having a working knowledge of spreadsheets, gINT, Microstation, various geotechnical software, hydrogeological software, and any transportation related experience is a plus.

Position requires overnight travel, mostly in North Carolina. OSHA HAZWOPER training desired but not necessary. Also, requires ability to obtain DoD military security clearance.

Duties require professional verbal and written communication skills and the ability to make informed, independent and professional decisions. Applicants must have a B.S or higher in Geology or Civil Engineering with emphasis on geology or geotechnical from an accredited university. CATLIN is an equal opportunity employer and offers competitive compensation and benefits.
